

SANTE

BACKGROUND

Breeder:	J.Vegter, Veendam
Parentage:	WY66-13-636 x AM 66-42
Maintainer:	Agrico
Introduction:	-
Market outlet:	Processing / Prepack

CHARACTERISTICS

Agronomic*		Disease Resistance*	
Maturity	6.5	Leaf Roll Virus	6
Yield	8	Virus A	1
Skin Colour	Yellow	Virus X	1
Flesh Colour	Cream/Yellow	Virus Y / Yntn	1
Tuber Shape	Oval	Early Blight	-
Eye Depth	7	Foliage Blight	6
Uniformity	7	Tuber Blight	8
Tuber Number	8	Blackleg	5
Freedom from Outgrades	7	Powdery Scab	8
Secondary Growth	-	Common Scab	5
Dry Matter Content	7	Dry Rot	8
Dry Matter	19%+	Wart Disease	Susceptible
Dormancy	6	PCN - Ro1	Susceptible
Damage	7	PCN - Pallida	Susceptible
Bruising	8	Spraing	5
		Slugs	-

Scale 1-9 (9=high resistance)

*Dutch Data

COMMENTS

At present the most popular main crop variety within the industry. Can produce high yields of round/oval yellow fleshed tubers. Will hold up under most conditions including blight, drought and scab. Sante can also be used for processing due to high dry matter.
